Identification of Compliance, Specialized Requirements & Skills for Migration

PROBLEM STATEMENT

A global pharmaceutical company has a large portfolio of 1000+ applications spanning a variety of technologies and vendors. The company hosts its applications at global data centers, regional data centers, office locations, and factory floors. Many of the larger applications also fall under regulatory compliance requirements. The company aims to undertake cloud transformation but faces the challenge of determining the appropriate applications, transition roadmap, and partner skills needed for cloud migration. With a substantial portfolio of applications spread across multiple data centers, the company needs to identify the optimal mix of applications suitable for cloud migration, select suitable cloud service providers, and ensure a seamless migration process with minimal disruption to their critical business operations.

OUTCOME

By partnering with Navikenz for cloud migration assessment, the global pharmaceutical company has been able to undertake a benefit-driven cloud modernization. The collaboration facilitated an in-depth assessment of the existing application landscape, enabling the identification of applications that can benefit the most from cloud modernization and migration.

With Navikenz's expertise, the company effectively prioritized applications based on their benefits and business value, ensuring a resource-efficient migration process. Proactively addressing compliance and specialized requirements further contributed to a smooth and disruption-free migration.

The engagement with Navikenz allowed the company to select suitable cloud service providers and partners to address new skills required for cloud migration. Embracing cloud technology with the support of Navikenz positioned the pharmaceutical company to achieve a modern and agile technological landscape while maintaining a focus on its core mission within the pharmaceutical sector.

SOLUTION AT A GLANCE

- Comprehensive Application and Technology Assessment

- Identification of Compliance, Specialized Requirements & Skills for Migration
