

NaviCADE™

AI-POWERED DOCUMENT PROCESSING SOLUTION

Automate, accelerate, and optimize document management

NaviCADE™ reduces manual work by automating document processing through information extraction, document comparison and providing key insights from the unstructured documents. It also provides users the ability to explore documents through conversational interface .

KEY FEATURES

INTELLIGENT DOCUMENT RECOGNITION

Automatically identifies and processes various document formats, including invoices, contracts, clinical reports, and more

ADVANCED AI ALGORITHMS

Leverages machine learning and natural language processing to extract and analyze key information

CUSTOMIZABLE WORKFLOWS

Tailored to suit the specific needs of industries like healthcare, finance, legal, and more

END-TO-END AUTOMATION

From ingestion to output, NaviCADE™ ensures a smooth document processing experience

SEAMLESS INTEGRATION

Easily integrates with existing enterprise systems, ensuring quick deployment with minimal disruption

NaviCADE™ Applications

PHARMACOVIGILANCE

Information extraction from medical reports , compliance reports , drug formulation , medical literature

CONTRACTS

Information extraction from different types of contracts and deriving insights from contracts through LLM

COMPARISON

Compare regulatory documents and identify the differences

BENEFITS

- **Increased efficiency:** Reduces document processing times by up to 80%, allowing faster decision-making and improved productivity
- **Cost savings:** By minimizing manual errors and labor-intensive tasks, NaviCADE™ leads to substantial cost reductions
- **Enhanced compliance:** Ensures adherence to regulatory standards by automating audit trails and document tracking
- **Scalable solution:** Grows with your business, adapting to increased document volumes and complexities without compromising performance

WHY NaviCADE™ ?

NaviCADE™ harnesses the power of AI to streamline document workflows, driving efficiency, precision, and compliance in the modern business landscape
